

Exhibit A — Recommendation Letter

Date: March 1, 2026

To Whom It May Concern,

I am Dr. Hassan Ali, Senior Researcher at the Broad Institute. I write in strong support of Ms. Wei Lin's petition for classification as an alien of extraordinary ability under EB-1A. I have known Ms. Lin since 2022 and have closely followed her work on single-cell RNA sequencing analysis pipelines, particularly her novel sparse decomposition technique published in BMC Bioinformatics (2023). Although I have never co-authored with Ms. Lin, I have cited her work twice in my own peer-reviewed publications.

Her contribution to memory-efficient cell-cell distance computation represents a meaningful advance in the field, with applications across major single-cell atlas projects. Her work demonstrates clear original contribution of major significance.

Sincerely,
Dr. Hassan Ali
Senior Researcher, Broad Institute
